DESCRIPTION

Bicol Peaks is a website that helps users discover the mountains, volcanoes, and natural attractions of the Bicol Region. It introduces the website and allows users to explore different destinations through pictures and descriptions. The Home Page includes a Theme button to change the appearance, a Menu button for navigation, and an Explore Destinations button to view more attractions. The image carousel allows users to browse different destinations using the arrow buttons. The Featured Destinations section highlights Mayon Volcano, Mount Isarog, and Bulusan Volcano, while the Explore by Province section lists the six provinces of Bicol. Overall, the website makes it easier for users to discover and appreciate the natural beauty of the region.

Home Page — index.html

The Home Page introduces Bicol Peaks with the heading “Discover the Peaks of Bicol.” It features a large destination image with previous and next buttons, an Explore Destinations button, and a Featured Destinations section. It also includes the Explore by Province section, where users can discover attractions in different provinces.

Destinations Page — destinations.html

The Destinations Page displays mountains and volcanoes with their pictures, names, provinces, and short descriptions. Users can search for destinations by name, province, or type and filter the results by category. Clicking a destination card opens a details window with its overview, province, elevation, and other available information.

Regions Page — provinces.html

The Regions Page organizes destinations into six provinces: Albay, Camarines Norte, Camarines Sur, Catanduanes, Masbate, and Sorsogon. Users can browse the destinations under each province and select a destination card to learn more about the place.

About Page — about.html

The About Page explains the purpose of Bicol Peaks and provides more information about the website. It includes frequently asked questions and a contact form that checks the user's name, email, message length, and selected date. The contact form is for demonstration purposes only and does not actually send messages.

JavaScript Features

1. Theme Toggle - switches between light and dark appearance.
2. Mobile Navigation - opens and closes the menu on smaller screens.
3. Image Carousel - allows users to browse featured images using arrow buttons and automatic rotation.
4. Live Search and Filters - helps users find destinations by name, province, or type.
5. Destination Details Window - displays additional information when a destination is selected.
6. Province Browsing - organizes destinations by province and provides links to their sections.
7. FAQ Accordion - allows users to open and close answers on the About Page.
8. Contact Form Validation - checks the entered information and prevents users from selecting past dates.

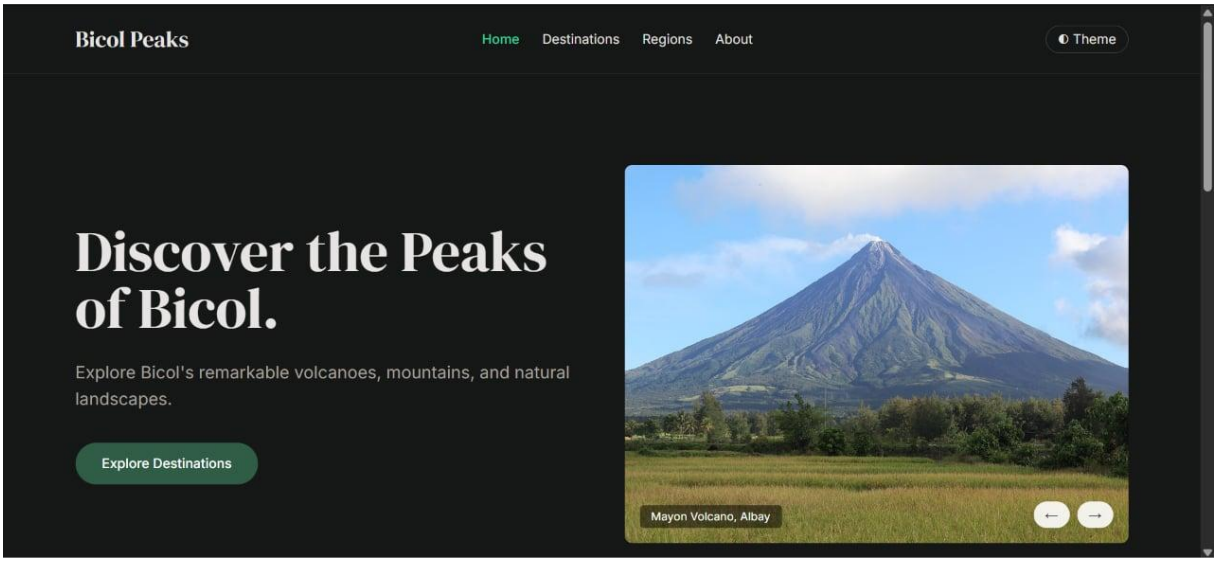

Estimated AI Usage

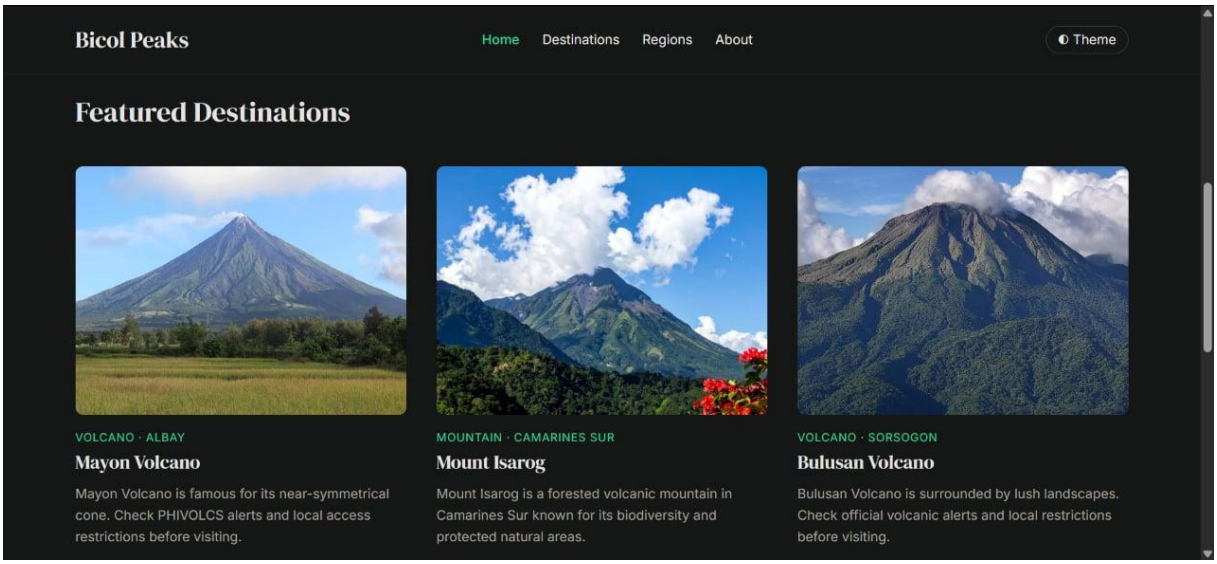

Estimated AI usage is 45%, mainly for the website layout, styling, and JavaScript, which was the hardest part for us. The remaining code was modified, improved, and developed by our group.
